

LMS365 unites leading-edge learning management technology with Office 365 to make learning part of your daily business process

Train distributed workforces using a single, unified platform
your business already knows how to use

Create Courses

Create courses on the fly and make them available immediately in your course catalog. Features include:

- Course Creator
- Course Catalog
- Configurable course registration & enrollment
- End-to-end course automation

Deliver Content

Access content anytime, anywhere. Complete training when you want. Features include:

- SCORM Player
- Assignment
- Gradebook
- Learning Path that supports multiple content types
- Quiz engine with different question types

Track & Manage

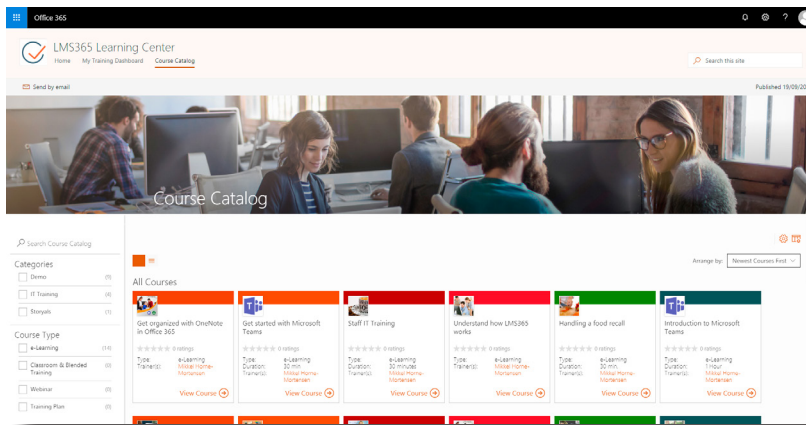

Log into your account and follow training progress instantly. Features include:

- Over-all administration
- Track all training
- Reporting
- Certificates
- Learner Dashboard for instant, personalized training overview

Let's see how it works!

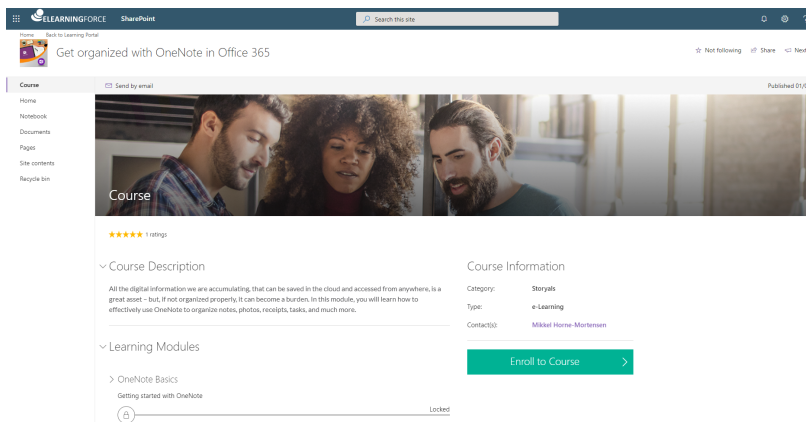

Course Creator & Catalog

LMS365's Office 365 Course Creator turns Sharepoint sites and content into full-blown, formalized courses that enable enrollment and make the most of Office 365's collaborative features.

LMS365 is built as a suite of learning add-ins that are added directly into an existing Microsoft Office 365 or SharePoint platform.

LMS365's Office 365 Course Catalog gives learners an efficient, dynamic way to find the education that's most relevant to their needs. Display a list of all courses or allow learners to search by category. Identify required courses and due dates. Show learners which courses they're already taking. One click is all it takes to enroll in or un-enroll from a course.

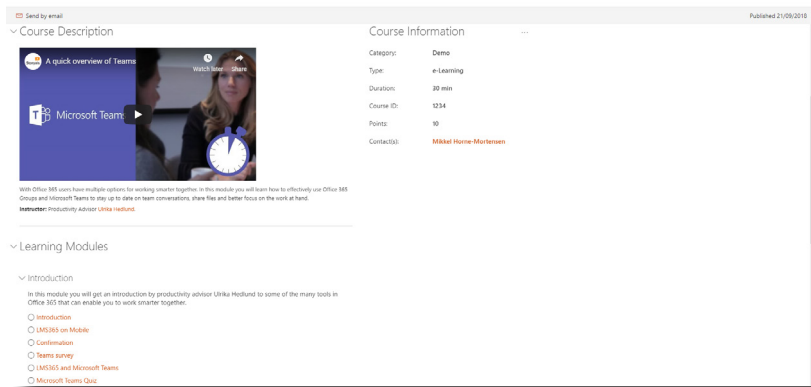

You will have endless options to create engaging and rich learning experiences.

Learning Module Builder

LMS365's Office 365 Learning Module Builder lets you combine quizzes, SCORM training, and any SharePoint or web content into a pre-defined learning module with sequenced learning steps. Learners move to the next step only after they've completed the last, ensuring gap-free training and allowing them to see where they are in the overall learning process. There's no better way to expose learners

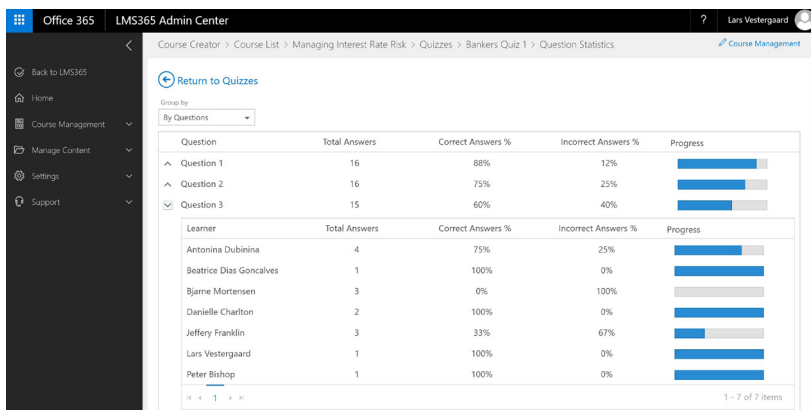

to new concepts in the most efficient order - and to ensure learners don't get confused or lost along the way.

Deliver efficient, multi-step learning

Quiz Builder

Use LMS365's Office 365 Quiz Builder to create attractive, easy-to-use quizzes that let learners test and demonstrate their knowledge. Place each quiz on its own dedicated "home" page, embed it next to relevant content on any Share-Point page, or include it in any LMS365 course. Build quizzes with three different question types and add them as standalone modules to your course or include the quiz in any Office 365 Learning Module.

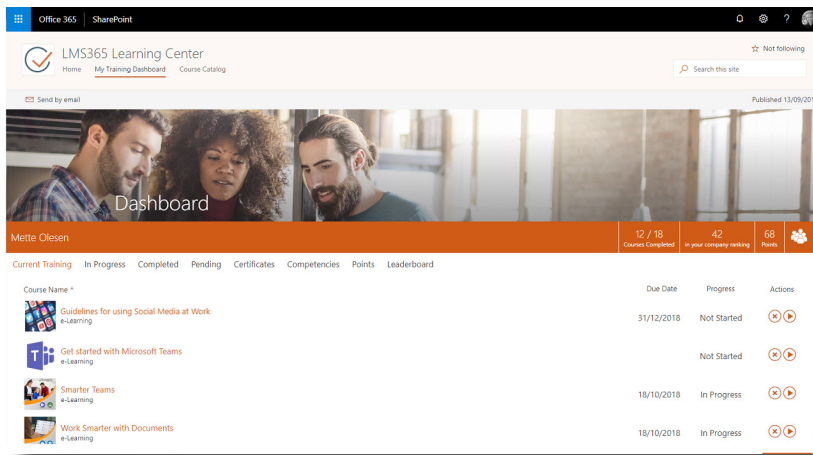

Create attractive, easy-to-use quizzes that let learners test and demonstrate their knowledge.

Learner Dashboard

LMS365's Office 365 Training Dashboard brings gamified learning to the Office 365 experience. Create a friendly yet competitive learning environment where recognition and rewards motivate learners to be the best on their team.

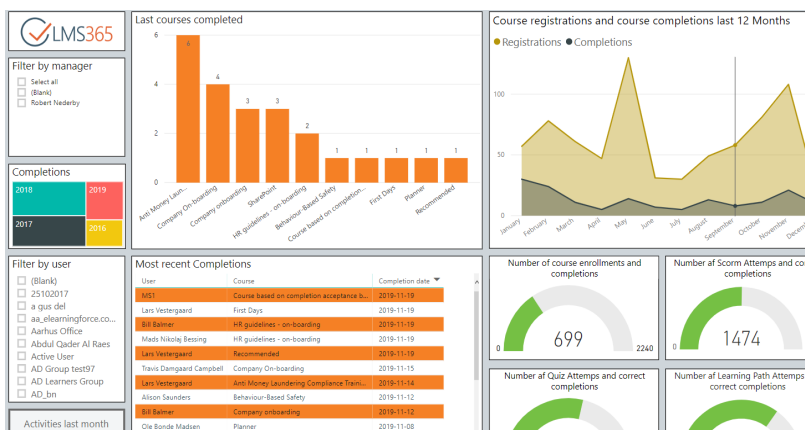

Make a personal training overview available to learners within Office 365. Show courses learners are taking, courses in progress, courses completed, Continuing Education Units (CEUs), certificates obtained, and a Leader Board ranking the Top 10 learners.

Create a friendly, yet competitive learning environment where your learners will be motivated by receiving the recognition and rewards they deserve

Reporting

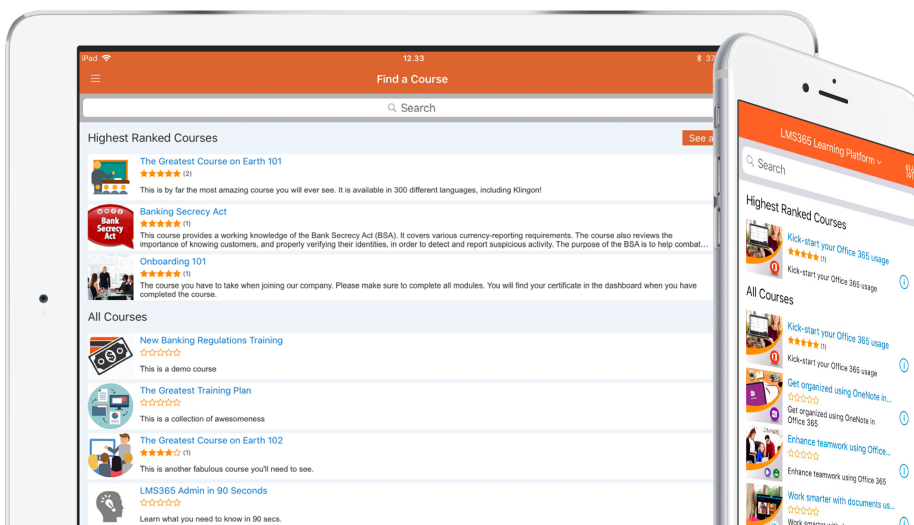

Use LMS365's Office 365 LMS Administration and Reporting feature to configure, control, and track the complete learning experience. Export all report to Excel or create stunning visual reports in Power BI, using our Power BI canned reports.

Easy to create stunning visual reports in Power BI

SCORM Player and Mobile App

The LMS365 Mobile App gives learners quick access to their courses and provides a personalized experience from their mobile devices, including the ability to take SCORM content offline. Accessing learning activities has never been more convenient with the intuitive LMS365 app - learn whenever, wherever!

Allow learners to access courses on mobile devices

Why LMS365?

LMS365 helps your organization realize its full potential faster!

- Engage learners within their daily business environment
- Get up and running in minutes - no need to train learners
- Scale to meet the needs of any size distributed workforce
- Enable employees to help each other become more productive
- Take advantage of your existing Office 365-based business process
- Eliminate the need to install, integrate, and manage third-party web services
- Deploy formalized courses or just-in-time, context-sensitive training anywhere in the business process
- Use existing Microsoft competencies to customize the learning experience and meet branding requirements
